

ESL Yes, No, Maybe

Yes, No, Maybe is a simple speaking activity that is great fun for young learners and even teens.

1. To start, first print out and cut up a copy of the cards below. In this pre-prepared activity the topic is food but this can be changed to any theme students may be studying.
2. When playing, a student first selects a card. The other students in class must ask questions about the card but the student who has the card can only respond with “Yes”, “No” or “Maybe”.
3. You can award points for correct questions or for students guessing the correct answer.

You can set the number of questions or set a time limit that students have to decide what the fruit is.
