

Identity Cards

Identity Cards is a simple introduction/ice breaker game to get students introduced to each other. This activity can be used with young learners, teens and adults.

Aim: To practice speaking, introducing another student and basic writing

Level: Lower Intermediate and above

Time: 10 - 30 minutes

Method

1. Put students into pairs and each student is given a blank identity card.
2. In pairs, students interview each other and fill in the blanks in their identity cards.
3. After, each student introduces their partner using the cards to help them.

Alternative Ideas:

- Get students to memorise the information on the cards and then tell the other students about their partner.
- Get students to draw a picture of their partner and later hang them in the classroom.
